PROFESSIONAL SUMMARY

Results-driven SQL Server & Data Engineering Professional with 3+ years of experience in Application Support, Database Administration, and Advanced SQL Development. Skilled in designing, optimizing, and supporting enterprise-grade systems using SQL Server (CTEs, Views, Indexing, Stored Procedures, Triggers, Query Optimization), ETL pipelines, and Data Warehousing solutions.

Hands-on expertise in Azure Data Engineering (Azure Data Factory, Azure SQL Database, Azure Synapse, PySpark, Cloud Storage, Triggers) and BI Reporting (Power BI, Dashboard Creation). Proven ability to deliver high-availability solutions, troubleshoot mission-critical applications, and support DBA operations.

SKILLS & PROFICIENCIES

- SQL Server (Expert), MySQL, PostgreSQL | Advanced SQL: CTEs, Views, Triggers, Indexes, Stored Procedures, Query Optimization.
- Database Administration: Backup/Restore, Monitoring, Replication, Security Management
- Data Engineering: ETL, Microsoft Azure (Data Factory, SQL DB, Synapse, Blob Storage, Monitor), PySpark.
- N8N & Cloude Code Automation
- BI & Reporting: Power BI (Data Modeling, DAX, Dashboards)
- Programming: Python (Automation, Data Processing), Shell Scripting
- Application Support: Linux & Windows Admin, API Integrations (REST, Postman, SMPP, SMSC)
- Tools: Grafana, Jira, Zoho Desk, Golden Eagle
- Soft Skills: Analytical Thinking, Problem-Solving, Client Communication, SLA-Driven Delivery

WORK EXPERIENCE

Avaal Technology Pvt Ltd.

2025 - Current Software Support Specialist

- Provided Database & Application Support for logistics solutions across US and Canadabased clients.
- Designed and optimized SQL queries, indexes, and stored procedures for improved application performance.
- Supported ETL workflows for data migration and reporting.
- Automated routine tasks using Python scripts & PySpark for faster SLA compliance.
- Assisted in developing Power BI dashboards and reports for client analytics and business insights.
- Managed client requests, performed root cause analysis, and ensured timely incident resolution.
- Maintained documentation for processes, troubleshooting steps, and operational procedures.
- Worked with cross-functional teams to support deployments, enhancements, and production activities.

Comviva Technology

2022 - 2024 Tech-Ops Engineer/Production Support Engineer

- Supported telecom solutions including MCA, VMS, NBA, USSD & IVR flows, along with SMSC, SMPP gateways, and API configurations.
- Managed SQL Server databases with troubleshooting, performance tuning, and query optimization.
- Deployed patches, automated monitoring scripts, and ensured high service uptime through proactive server monitoring.
- Handled PO/SO lifecycle, inventory management, shop/user data, and role-based access control.
- Provided L1/L2 support for application servers, Linux systems, and basic network troubleshooting.
- Performed user management and resolved client issues while ensuring SLA compliance and timely resolution.

EDUCATION

Chandigarh University -Punjab(PTU)

2022

2018-2022: Bachelor Of Technology (ECE)

Punjab, India

CGPA - 7.5
